Q73: Used this app for a month. As your rank increases, you start getting weaker cards. Frequent "Reconnecting" errors cause missed final moves. The ranking system is completely broken — it shows wrong point calculations (e.g., 10+30=20). I lost around 800 points due to this. Please fix these major issues!

A: We want to assure you that we are actively working to resolve these major issues. We have identified the bugs you have reported, and our team is prioritizing fixes. We appreciate you bringing these to our attention, as your feedback is crucial in helping us improve the app for everyone.

Q273: Changing my star to 1. Doesn't let you win. Everyone gets good cards and you're stuck at 1-2 max and even gets failed. Good game but disconnects many times & play shouldn't continue when we don't have Spade cards or face cards. I have many games where there's no spades and lost. Literally 0 pointer games. Also, when someone is winning, they give only good cards & when someone is losing, they give only bad cards. The bot totally ruins the gameplay. I'm removing my star from 3 to 2.

A: We are sorry for the frustration due to disconnections, unbalanced cards, and bot interactions. That's why in our recent updates, we have worked on connection stability, ensuring at least one spade for every player, and refining matchmaking to prioritize real users. Please try the new version and share your thoughts for our continued improvements!

Q716: I would have given it 0 rating, but unfortunately you have to give atleast 1 star. There is no point of selecting (play with humans). You always have to play with 1 or 2 bots out of 4 spots. And each time you get Most useless set of cards. Still being accurate with win prediction you always come 3rd or 4th and one of the bots comes first ■. Most usless card game. The game was asking me for review, so here is the review.

Q1840: Mental Developer. When I get First position, system give me just 10-13 positive skill beta score. But when I get third position, they give me 30-40 negative score. Just psycho system. When I get bad card, this is card problem, not my skill problem. They give me bad card and when I get lost they give me huge number negative score. If you want to give negative score, You should follow a fair counting system. And also need fair card distribution system. Give little negative score for bad card lost.

A: We really appreciate your feedback. With that we are now happy to share our updated and fairer skill calculation: +30 points for 1st place, +10 for 2nd, 0 for 3rd, and -40 for 4th place. Also, we are actively working towards a more consistent fair card distribution for an even better gameplay experience. We truly value your patience and feedback!

A: Dear user, your words of appreciation mean everything to us. We're thrilled to have you on this journey and can't wait to surprise you with more updates soon!

Q1849: A totally third class gaming experience. New updates are fourth class. Don't ask why. Zero star. very poor skill calculation. When I ranked 4th position then deducted 52 points... and when the opponent ranked 4th position then deducted only 14 points. when I won then I got only 13 or 14 points and when others won they got 22. when I ranked second then also my points deducts... Very poor card distribution. It's all making game. No reality.

A: We truly appreciate your patience! We are pleased to share that we are back with an updated and more fair skill calculation. The updated calculation is: + 30 points for 1st place, +10 for 2nd, 0 for 3rd, and -40 for 4th place. Please try it out and let us know if it enhances your experience. Your feedback is incredibly valuable to us!

Q2287: Changing my star to 1. Doesn't let you win. Everyone gets good cards and you're stuck at 1-2 max and even gets failed. Good game but disconnects many times & play shouldn't continue when we don't have Spade cards or face cards. I have many games where there's no spades and lost. Literally 0 pointer games. Also, when someone is winning, they give only good cards & when someone is losing, they give only bad cards. The bot totally ruins the gameplay. I'm removing my star from 3 to 2.

A: We are sorry for the frustration due to disconnections, unbalanced cards, and bot interactions. That's why in our recent updates, we have worked on connection stability, ensuring at least one spade for every player, and refining matchmaking to prioritize real users. Please try the new version and share your thoughts for our continued improvements!

Q2730: I would have given it 0 rating, but unfortunately you have to give atleast 1 star. There is no point of selecting (play with humans). You always have to play with 1 or 2 bots out of 4 spots. And each time you get Most useless set of cards. Still being accurate with win prediction you always come 3rd or 4th and one of the bots comes first . Most usless card game. The game was asking me for review, so here is the review.

Q3854: Mental Developer. When I get First position, system give me just 10-13 positive skill beta score. But when I get third position, they give me 30-40 negative score. Just psycho system. When I get bad card, this is card problem, not my skill problem. They give me bad card and when I get lost they give me huge number negative score. If you want to give negative score, You should follow a fair counting system. And also need fair card distribution system. Give little negative score for bad card lost.

A: We really appreciate your feedback. With that we are now happy to share our updated and fairer skill calculation: +30 points for 1st place, +10 for 2nd, 0 for 3rd, and -40 for 4th place. Also, we are actively working towards a more consistent fair card distribution for an even better gameplay experience. We truly value your patience and feedback!

Q3863: A totally third class gaming experience. New updates are fourth class. Don't ask why. Zero star. very poor skill calculation. When I ranked 4th position then deducted 52 points... and when the opponent ranked 4th position then deducted only 14 points. when I won then I got only 13 or 14 points and when others won they got 22. when I ranked second then also my points deducts... Very poor card distribution. It's all making game. No reality.

A: We truly appreciate your patience! We are pleased to share that we are back with an updated and more fair skill calculation. The updated calculation is: + 30 points for 1st place, +10 for 2nd, 0 for 3rd, and -40 for 4th place. Please try it out and let us know if it enhances your experience. Your feedback is incredibly valuable to us!
